<https://108.168.231.205:8443/#v1/applications/tA00udqi/entities/tA00udqi/summary>

The screenshot shows the Apache Brooklyn web interface. The top navigation bar includes 'Home', 'Composer', 'Applications' (highlighted), 'Catalog', 'Script', and a help icon. On the left, the 'Applications' sidebar shows a tree view with 'Shankar Web Cluster' expanded, containing 'My DB' and 'My Web'. The main content area displays the 'Shankar Web Cluster' details, including its status (RUNNING), service up status (true), type (org.apache.brooklyn.entity.stock.BasicApplication), and ID (tA00udqi). There are also links for 'Blueprint' and 'Config'.

Network Monitoring Information

The screenshot shows the 'Network Monitoring Information' page. It includes a 'Planned Events' section with a 'View' dropdown set to 'All'. Below this, there are two sections: 'Up Bare Metal Servers' and 'Up Virtual Servers'. The 'Up Bare Metal Servers' section shows 'No Devices Found'. The 'Up Virtual Servers' section shows a table of 7 devices with columns for 'DEVICE NAME', 'NOTES', 'PUBLIC IP', 'PRIVATE IP', and 'DATACENTER'. The table lists various servers, including 'spark1.shankar.net', 'spark2.shankar.net', 'spark3.shankar.net', 'brooklyn.shankar.com', and several 'brooklyn-ompi4-shankar' instances.

DEVICE NAME	NOTES	PUBLIC IP	PRIVATE IP	DATACENTER
spark1.shankar.net		169.53.128.114	10.122.149.194	San Jose 1
spark2.shankar.net		108.168.231.202	10.91.63.112	San Jose 1
spark3.shankar.net		108.168.231.203	10.91.63.123	San Jose 1
brooklyn.shankar.com		108.168.231.205	10.91.63.126	San Jose 1
